

eHM - electronic House Manifest

Fast, digital and easy

eHM completely replaces paper house manifest

What is eHM?

The house manifest (also known as cargo- or consol manifest) lists all information of the house air waybills (HAWB) for each consolidated shipment. eHM replaces paper house manifests or consol manifests with electronic messages/data (FHL, xFZB, ONE Record, eAWB Data Capture at Lufthansa Cargo's eServices).

Using eHM instead of paper house manifest lists is an important step towards 100% eFreight. This process is recommended by IATA since 2014.

Customer pouches, which may contain original HAWB for example, remain unaffected.

How to switch to eHM?

- ✓ Make use of eAWB
- ✓ Replace paper house manifest by high-quality electronic data (FHL/5, xFZB, One Record, eAWB Data Capture at Lufthansa Cargo's eServices)
- ✓ House manifest data will be verified within PreCheck or at goods acceptance
- ✓ After account activation for eHM by Lufthansa Cargo every eAWB consol shipment is a possible eHM shipment
- ✓ No further steps required during the booking process

Once activated – always paperless!

With eHM activated, please ensure to not deliver paper house manifest anymore.
