“Going Paperless” with Lufthansa Cargo

Becoming 100% paperless

Most consignments can already be transported paperless by air freight today. eFreight shipments offer many benefits for forwarders: by removing paper documents from processes all workflows can be simplified, and digital data is always in the lead. There are two options for **eFreight shipments**:

→ **EAP** = eFreight **with** accompanying paper documents

→ **EAW** = eFreight **without** accompanying paper documents.

Lufthansa Cargo fully supports the industry goal of 100% eFreight and, additionally, offers the transport of **pure paperless shipments (EAW)**. This applies for general cargo; excluding special cargo. Moreover, for most destinations, e.g., India, no paper requirements exist by authorities.*

Please note: few **destinations might still require paper documentation (e.g., MEX, CAI, etc.)*

All possible shipments declared as **EAW** and **delivered** to airline **without accompanying paper documents** support your shipments in a seamless, quick and transparent transport process.

Top EAW destination countries, where general cargo can easily fly paperless
