“eAWB only” – shipments with Lufthansa Cargo go digital

The paper-AWB will be replaced by eAWB

Lufthansa Cargo supports digitization in the airfreight industry. Shipment data can be easily transmitted electronically via messaging solutions or e.g., Lufthansa Cargo's web-based and free-of-charge “eAWB Data Capture”.

Since 2022, all shipments on eAWB feasible trade lanes with Lufthansa Cargo are transported exclusively as eAWB shipments – **eAWB only**. For shipments that are not delivered as eAWB, Lufthansa Cargo applies a chargeable **“Paper-to-eAWB” (P2e)** service which enables a paper-to-eAWB shipment.

For shipments already delivered as eAWB the known procedure remains unchanged.

“eAWB only” at a glance

For all non-eAWB shipments on eAWB feasible trade lanes the “Paper-to-eAWB” (P2e) service is applied:

- Paper AWB is already digitized to eAWB at the time of export acceptance
- Shipment data is available electronically throughout the entire transport chain
- Paper-AWB is not transported
- Other accompanying documents are unaffected, e.g., pouch will continue to be transported
